Profile Summary

I am Saeed Gharari. Dental surgeon and implantologist . In January 2023, I graduated from the Department of Dentistry at Ardabil University of Medical Sciences with a total GPA of 17.67 as the top of my class. During my dental education, I was actively involved in organizing several workshops and courses, and due to my high public relations and excellent management skills, I worked as an intern and assistant of professors in various treatments.

I also succeeded in making positive changes in materials in research projects on dental materials and reached the patenting stage.

During my diploma, I completed elementary school at Farokhi School in Marand and middle school and high school at Allameh Jafari Intelligent School(National Organization for Development of exceptional talents) with a GPA of 19.96 as a brilliant talent and rank 1.

In addition to my brilliant academic career, in non-academic fields, I have had a background in piano playing since 2008, computer programming since 2009, and an IT degree since 2011.

In 2012, I was awarded the top rank in the Mathematical and Computer Olympiad and was also selected as a selected team in the "Hellinet" programming competition for brilliant talents.

Also, in 2013, I was accepted into the World Physics Olympiad and received a scholarship from MIT University of Boston in the United States and became a permanent member of the American AAPT Association.

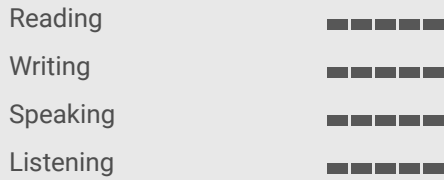

Currently, I am living in the cities of Tabriz and Tehran in Iran and am engaged in all dental treatments, including implants, laminates, direct or indirect restorations, lasers, gum surgery, root canal treatment, etc.; I also intend to continue my studies in the field of oral and maxillofacial surgery and I am interested in expanding my business and expertise in the fields of therapy and commercial-therapeutics with an emphasis on aesthetic treatments.

Education

PhD in Medical Doctorate

Branch: Doctorate of Dental Surgery (D.D.S)

Institute/University: Ardabil University of medical science
Ardabil, Iran

January 2018 - January 2024

GPA: Arums

I have studied for a PhD in Dental Surgery at Ardabil University of Medical Sciences. PhD in Dental Surgery is the most popular degree among students who take the entrance exam or entrance exam to Iranian universities. I graduated from this university with an overall GPA of 17.67 as one of the best students in this course and during my studies, I have experienced various treatment methods from my professors and colleagues.

I have also worked as a researcher, trainee and intern in research and treatment during my studies.

I have been the director of the Health Association in the field of student affairs and also worked as a vaccination officer and director of vaccinators during the Covid-19 pandemic.

Diploma in Biology Diploma

Branch: Biology

Institute/School: National Organization for Development of Exceptional Talents

Marand , East Azerbaijan, Iran

September 2009 - June 2016

GPA: NODET

I completed my college and high school studies in the field of experimental sciences (biology) at the School of Brilliant Talents (National Organization for Developing Brilliant Talents) as a top talent and an excellent student with a GPA of 19.96, and I managed to achieve top rankings and various honors in several national exams and Olympiads. Being selected as one of the top 100 talents of 2009, being accepted into the Math and Physics Olympiads, receiving a scholarship to MIT University in the United States, and several other honors were some of my successes during this course of study, which are explained in detail in the rest of my resume.

PhD in Medical

Branch: Doctorate of Medical

Science

Iran

In 2016, I passed the university entrance exam for the medical field at the University of Isfahan, but due to personal issues and personal goals, I dropped out of this field after one year of study and re-entered the national exam for dentistry and was accepted.

Work Experience

Surgical Assistant

Sina surgery complex

Ardabil, Iran

Tasks and Achievements

Due to my interest in the field of maxillofacial surgery and the demonstration of my individual abilities during my studies at university, as well as strong public relations, during my student years, in coordination with the professors of the Department of Surgery, I worked as a surgical assistant in the operating room every Thursday, performing various maxillofacial surgeries, including rhinoplasty or surgeries for jaw problems or traumatic and aesthetic patients, and I learned tips from the professors.

IT Expert and Data Manager

Iran

Tasks and Achievements

During my schooling period, at the age of 12, I entered the Education and Training Organization, the Education Activities Management Department, and due to my skills in computer-related matters, including ICDL skills and programming, I was trained as a computer and IT expert. Then, I became independently responsible for the electronic files department and was honored as the youngest expert in the Education and Training Organization. I continued this work along with my studies until high school (age 16).

Executive Director of the Student Organization

Iran

Tasks and Achievements

In high school, due to my experience in the student organization, I was selected as the executive director of the student organization, and for two years, I was responsible for managing all student affairs for about 400 students until I graduated.

Technical Officer of the Red Crescent Dental Department

Iran

Tasks and Achievements

The Iranian Red Crescent Society is a modified branch of the International Red Cross Society and is an international non-governmental organization that provides medical and rescue services. In the final year of my dental studies and during my internship, I and a friend signed a contract with the Ardabil Red Crescent Dental Department, based on my work experience and cooperation with professors during my internship. We carried out all medical work in this center at the provincial level and also organized several free public relief and service projects.

Dentists at the Ministry of Health and private clinics

Iran

Tasks and Achievements

After graduating, I worked for a year in health centers in deprived areas of Ardabil province, as well as in private clinics, providing dental services and treatments to people. Efforts were made to provide health education and treatments as much as possible to improve the culture and health status of these areas.

Dentist of the Armed Forces Organization and private clinics

Iran

Tasks and Achievements

After working at the Ministry of Health, I served for a year in the Armed Forces Organization and Shahid Mahallati Hospital in Tabriz, providing dental treatment and performing dentistry under anesthesia in the operating room for patients with severe phobias or gag reflexes or mentally retarded patients. At the same time, I worked in private clinics in East Azerbaijan Province until the end of my military service.

Dentist and Implantologist

Personal office

Iran

Tasks and Achievements

After completing my military service, I started my own practice in Tabriz in the fields of implants, laminates, prosthetics, root canal treatment, dentistry under anesthesia, and pediatric dentistry. Currently, in addition to private clinics in Tehran and Tabriz, I am working in my own practice and am preparing for the specialization exam and continuing my education in the field of oral, maxillofacial surgery.
